

**Cassette 808** is a free Roland TR-808 sample collection based on Gregor Zemljic's excellent free 808 recordings that he released back in 2010. We took these samples (with the author's permission) and resampled them from an old audio cassette deck.

This way you get both the squeaky clean, superb 808 samples made by Gregor and our noisy, distorted samples in you prefer your drums dirty and grimy. These samples are available exclusively on Bedroom Producers Blog. Please don't reupload this sample pack anywhere else.
